

Table of visual evaluation and dimensional tolerance of products.

Additional guidelines for customers are based on our years of experience.

1. Visual evaluation table.

The above table suggests to us from what distance (e.g. 200cm) the printout should be verified.

2. Table of tolerance from the dimension of the finished product.

Note: Each material of the product group may have a different tolerance value. It depends on the printing technology and the specifics of the material.
